

Samuel Alves

WEB DEVELOPER

Solid experience in web development, specializing in creating Web Apps, APIs, and Landing Pages with personal projects on GitHub. A motivated professional with a focus on communication, problem-solving, task management, and committed to achieving exceptional results.

MAIN PROJECTS

STUDY POM

A Pomodoro timer built with React, TypeScript, and Firebase, available on my GitHub for anyone who wants to practice the Pomodoro technique in their studies and daily work. It features responsiveness and animations that prioritize the user experience, with a friendly and intuitive interface.

CHAT MASTERY

Chat Mastery is an interactive language learning application that allows users to practice their English-speaking skills by engaging in conversations with an AI-powered chatbot. Developed using OpenAI API, ReactJS on the frontend, and Node.js with Express on the backend.

LANDINGS PAGES

Experience in creating responsive landing pages, with features that prioritize user experience, aiming to provide the best browsing experience possible.

WEATHER APP

A Web App for weather queries developed with React on the front-end and utilizing services from the Open Weather API to obtain weather data.

EDUCATION

BACHELOR'S DEGREE IN INFORMATION SYSTEMS

Pitágoras College

January/2022 - December/2023
