

Samuel Alves

WEB DEVELOPER

Experience with web development in creating Web Apps, APIs, and Landing Pages with personal projects on GitHub. Motivated professional with solid experience in communication, problem-solving, and task management, committed to achieving exceptional results.

MAIN PROJECTS

WEATHER APP

A Web App for weather queries developed with React on the front-end and utilizing services from the Open Weather API to obtain weather data.

STUDY POM

A Pomodoro timer built with React, TypeScript, and Firebase, available on my GitHub for anyone who wants to practice the Pomodoro technique in their studies and daily work. It features responsiveness and animations that prioritize the user experience, with a friendly and intuitive interface.

LANDINGS PAGES

Experience in creating responsive landing pages, with features that prioritize user experience, aiming to provide the best browsing experience possible.

EDUCATION

BACHELOR'S DEGREE IN INFORMATION SYSTEMS

Pitágoras College

January/2022 - December/2023
